## **Abstract**

### **Part accounting internationality and E-Trading in globalization**

Freedom exchange commercial between international world liberation commercial gradual of entries customs intensification Strength Corporation manifold nationality to wrap oneself in much or frequently internationalize that to occur to road diffusion branch in region internationalize that unless control corporation to continue. From positioned recent in field accountancy what respect exportations importation intervention much or frequently from operation legislated.

Appearance revolution information reason diffusion computer, E-mail, and the Internet for consolidation globalization to flow information required to take after to great exits accounting systems on private and public level, and not possible to this information be was usefulness enough What midwife comparison gauging to establish measurement of which perform blessing appearance need diamond gauging accounting internationalism.

The standard use to international accounting to configuration the list and finances data becomes principal demand and necessary to terminations and different access in the finances social and management project until government too.

It information revelation and diffusion the computers, E-mail and the Internet is helped too much to explain the E-trading, or more suitable to do understanding establish the E-trading of all its tools.

And this meaning the E-trading is becomes real base to globalization to buckle of its demands.

In that the E-trading this others to diamond needing to field international accounting from problem of financing product price, and company stocks recording problem in the international stocks and investment stock in all international different stocks to necessary return the financing list to foreign company to become count the accounting principle accepted generality.

Then we can speech: international accounting its material base to success E-trading, and E-trading has the material base to success understanding globalization.

So I, discuss this research on 3 converted:

The first converted \ international accounting –definition- standard international observing range and financing price.

The second converted \ E trading – understood-determining.

The third converted \ the globalization – understood – tools- foundation (organizations) and trade with it.
